

I take the worst cases, anything and everything. Any breed, age or issue. 15 years of horse training and animal psychology and experimental training. Trick and cavalry training is also available. References always available. Due to the high intensity quality and range of what I do, each horse is accepted on a one at a time basis. I do not train thirty horses out at a time. I accept clients only who are willing to be active participants. I offer training at your facility. Two types of programs are available. Program one is for those who need or want a trainer to train their horse. Program two involves teaching you the client how to train your horse to whatever end. Note to all clients, there is no 'breaking' done here. Volunteer students and apprentices are welcome any time of the year. If you are a college student, young horse enthusiast or ready to start you may volunteer for awhile then begin the apprentice program. Volunteers never muck stalls. Volunteers learn basic concepts and skills in all fields. Email is the primary contact source. Have a great ride.
